Bilateral Meetings

- Friday 12:40 - 17:00

Description

Company Sinterfuse is specialized in the manufacturing of highly precision metal parts for wide use. The company is owned by **King Engine Bearings, from Israel**. King Engine Bearings is known worldwide as the leading innovator and manufacturer of engine bearings. Successful development of technologies, the advancement in metallurgy and the quality of King's business have contributed to Sinterfuse to streamline its experience and expertise.

Company Sinterfuse is also specialized in the production of parts for mechanical and hydraulic systems. Sinterfuse is the major manufacturer of complex geometry tooth gears, gears with real teeth and gears with slit (helicoid) teeth. Metal powders from which they can be produced are: stainless steel, standard steel or different alloys, etc.
