- Friday 12:40 - 17:00

Description

We are an engineering company providing integrated services of industrial project design and work supervision/direction. Along with provision of standard engineering services we are specialized in industrial projects in all operation phases, while fully respecting local legislative. In particular, Automotive, Oil and Gas and Food industry, We are guided by principles of international engineering - FIDIC and EU standards.

Our performance is based on vast experience gained in variety of different projects, enhanced management, quality control, health and safety and work direction. Our Objective is to provide complete support to the respectable Investor in every phase of investment in order to define most effective technical solution. Suitable location in Central Serbia and good communication skills and organizational capacities allow service provision on international level.

We are proud FCA (Fiat Chrysler Automobiles) engineering services supplier in Serbia since 2009.
